

Make the Chimera font

BitFontMaker2™ BitMap Font Editor

Visit this site to make a pixel font and turn it into a TTF.

www.pentacom.jp/pentacom/bitfontmaker2/

Window

This is what it looks like

The screenshot shows the BitFontMaker2 web application interface. The main area is a grid editor with a large 'A' character being drawn. The right sidebar contains a character map, a test drive section with a 'DRAW' button, and a 'BUILD FONT' button. The footer includes the logo 'BITFONTMAKER2™ BITMAP FONT EDITOR FOR PIXEL ENTHUSIAST' and social media icons.

Click the Import/Export button

Paste in the Chimera font text (provided separately)

Now click the Import button

When you're ready, build the font (press the "BUILD FONT" button) to make a .TTF
